

## New Safety Guidelines

1. Please call our office when you arrive, **248-625-5222** to begin the prescreening process.
2. Before exiting your car, please secure your mask. If you did not bring a mask, one will be given to you inside the office.
3. Our doctors, hygienists and assistants will be wearing a protective mask, eye protection, and gloves to reduce the risk of transmission of the Coronavirus and ensure your safety during the visit.

### Cleaning and Sanitation *(It's what we've always done!)*

- A. After every visit all treatment room surfaces are wiped down with CDC approved cleaning products, and all office surfaces are disinfected daily with CDC approved disinfecting agents
- B. All single-use products are disposed of in an approved manner
- C. All other instrumentations are cleaned in our Hydrim (medical grade dishwasher), labeled and sterilized per OSHA recommendations.

### After Your Dental Appointment

- Carefully remove your mask when you reach your car and remember to avoid touching your face until you can wash your hands
- If you become Covid19 positive in the 14 days following your appointment, please notify us by calling 248-625-5222

*Since we have always used recommended PPE, and safe and thorough sanitation and sterilization for every appointment, there is no additional charge for PPE.*
